

REMARKS/ARGUMENTS

Applicants hereby submit their request for continued examination of the above-identified application. On January 8, 2007, Applicants submitted their request to add an inventor and petition to correct inventorship with supporting documentation (Exhibit 1). On January 10, 2007, Applicants submitted a supplement to that request when they received the replacement declaration of one of the missing inventors (Exhibit 2).

On February 2, 2007, an Advisory Action was issued indicating that the declarations of the inventors would not be entered. In response, Applicants filed a Request for Continued Examination and a short Reply to the advisory Action referencing the previously submitted materials (Exhibit 3).

On May 29, 2007, the decision on Petition was mailed, dismissing the petition because the declaration of one of the inventors, Gary L. Curtis, contained "alterations" that were not initialed and dated (Exhibit 4). Applicants filed their Reply to that decision on August 8, 2007, providing a "Supplemental Replacement Declaration and Power of Attorney" for Mr. Curtis (Exhibit 5).

In view of the foregoing, Applicants' papers requesting correction of inventorship are now in order. The Examiner is requested to consider the foregoing papers and determine that Mr. Peace is indeed a co-inventor along with the named inventors.

Applicants also request that the Examiner accept Mr. Peace's declaration demonstrating prior conception and reduction to practice of the subject

matter of these claims. That declaration removes the '865 patent as prior art. Thus, the present application should be deemed allowable and an interference with the '865 patent declared. Such action is respectfully solicited.

For the Examiner's convenience, Applicants provide below an index of the materials included in Exhibits 1 through 5.
